

Our electric vehicles are environmentally friendly because they are silent and don't emit smoke.

They may help your business create your integrated image. The variable special units mounted on the cars allow you to sell a wide range of products.

Their great advantage is that they can be easily packed up and locked to leave the position of sale.

Best for mobile street selling, the cars

- are suitable for road traffic;
- work without external electricity supply;
- can be used inside buildings;
- can be used in areas where internal combustion engines are prohibited;
- may also be used in parks and green belt areas;
- move flexible to dense consumer areas;
- are welcome by children;
- can easily return to base;
- can be easily maintained, cleaned, refilled;
- don't stay on the selling place outside working hours, so
 - they don't charge the environment;
 - there is no need to guard them;
 - they will not be object of vandalism.

Central office:
1134 Budapest, Rózsafa u. 13. / Klapka Office Building
